MEMORANDUM TO THE FILES

I had a telephone conversation with Mr. David Summers, Legal Adviser to Assistant Secretary Peterson of the War Department. I explained the need for able legal assistance from the War Department. Mr. Summers said he had been concerned with the scientist problem but understood that the War Department's only project was for temporary admission to the United States. He seemed surprised that the SWNCC memorandum called for permanent status. He said he would get in touch with me later that day, or Monday, April 29.

April 30, 1946.

Mr. Summers not having called me I called him. He said he had been busy; that he was expecting to leave the War Department shortly and, therefore, thought he ought not to get into this matter himself; that he would get some other people together and let me know when we could have a meeting.
